Dr. Harmon C. McAllister
Associate Research Director
The Council for Tobacco Research - U.S.A., Inc.
900 Third Avenue
New York, NY 10022

Dear Dr. McAllister:

My research on the molecular genetics of bacterial persistence addresses issues of both practical and theoretical importance which may be of interest to the Council for Tobacco Research. I would appreciate learning how this research should be brought to the attention of the Council for its consideration for possible funding.

Sincerely yours,

Harris S. Moyed
